To Whom It May Concern,

As a rapid growth business we had to streamline and simplify our Safety Programme and embarked on a search to find and institute a management tool that provided us with up to date information while maintaining ease of use and understanding.

The ASSA workplace practices system easily met our criteria covering all that was required and more.

Overall this system is efficient, saves time and delights my clients along with the added bonus of me knowing of any amendments to legislation or work practices immediately.

Jeff Keech
Service Manager.
