In my position as the OH&S Manager/Officer for City Holden I was faced with the daunting task of updating current Safe Work Procedures (SOP's) and creating new SOP's to ensure our compliance with regulations/legislation.

ASSA happened to arrange for one of their field Representatives to meet with me and to my delight they (ASSA) had the very material and resources to cover all the specific SOP's that I would otherwise have had to create myself.

As a large Automotive Dealer we had no hesitation in forming a partnership with ASSA to fulfill our OH&S obligations. Their Workplace Practices Manual together with the subscription based website has been invaluable to ensure we remain current and up to date with all relevant Legislative changes.

It's a simple case of accessing the relevant CD to print hard copies of SOP's, checklists and various forms.

I have no hesitation in recommending ASSA to help any organisation, large or small, through the maze of OH&S requirements to ensure peace of mind compliance with Regulation/Legislation.

Manager - OH&S
