To Whom It May Concern:

Followmont Transport is a leading Transport and Magazine Distribution company based in Queensland.

The company employs approximately 420 staff throughout Queensland encompassing Administration, Clerical, Warehousing/Distribution and Transport/Logistic functions and is committed to ensuring the highest possible standards in Workplace Health and Safety.

To assist the Health and Safety team to achieve the required on going professional standards the company uses Advanced Safety Systems Australia (ASSA) to provide an extensive range of up to date information and Administrative procedures including a broad range of company policies, templates, forms and workplace practices on DVD's.

There is also an invaluable comprehensive range of Standard Operating Procedure downloads available from their informative website.

On behalf of the management of Followmont Transport I thoroughly recommend ASSA as a very cost effective and comprehensive Health and Safety tool which can be easily adapted to any Workplace.
