October 10th 2008

Debbie:

I would like to thank the team ASSA for making my life as a business owner so much easier with this system.

Before I made the call and purchased this system I spent unknown hours researching and trying to develop a safety system for my business that would be compliant with all the local government regulations as well as any federal requirements'.

This is the true complete package with hard and soft copy manuals as well as online support and most important to me is the one on one help.

I honestly believe this system has saved me thousands of dollars and more important to be is my staff read the documents and now have become more active in their own roles with regard to safety and daily operations.

I can not recommend this system highly enough.

Again thank you

Sincerely

Philip Hodge
