

Letter of Support

It is with pleasure that I provide a referral for All Site Safety Audits (ASSA).

MTI Group had been in the process of drafting its own OHS manual when it was approached by ASSA in 2006. Once we saw the quality and comprehension of the ASSA system, we recognised the value for money the ASSA system represented. With annual updates, we can be assured our system reflects current OHS legislation.

Our organization has benefited substantially from having the ASSA system implemented. We have had two safety audits since investing in the system (one a national company, the other an international organisation), both times passing with only minor non-conformance. Without the system we suspect those audits would have been substantially more difficult for us.

I have complete confidence in the ASSA system and the back-up provided after the sale. We are confident that the services they provide has the capacity to assist a great number of other WA small businesses achieve OHS legislative compliance.

Yours sincerely,

Glenn Tobin MBA AIMM
General Manager
