Hi Debbie,

Just a short note to say thankyou to ASSA for making the daunting task of OHS&W procedure preparation and reporting easier. My business has grown dramatically over a 5 year period, much faster than we thought it would. We had a lot of procedures in place but nothing had been formalised and I had no idea where to start.

Using the system purchased from ASSA made the task simple, the Employee handbooks have become an invaluable part of our induction process , easy to go thru with new employees and a quick reference guide for them also. The preparation of SWMS was quite simple as well with the editable templates supplied. I have had reason to produce the documentation to Safe Work SA recently and they were satisfied with information contained in them.

I would have no issues recommending ASSA to other businesses and in fact have already done so

Thanks again

Scott Ware
