Dear Sir

ASSA WORKPLACE PRACTICES MANUAL FOR STATE OF VICTORIA SAFE ACCESS SYSTEMS REFERENCE LETTER

This letter records our sincere appreciation of the excellent service and courtesy experienced throughout our Company's dealings with ALL SITE SAFETY AUDITS.

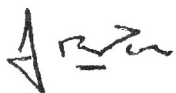

The State of Victoria 2006 edition of ASSA Workplace Practices Manual (hardcopy and compact disc) was received during August 2006. Our management found the Manual a comprehensive and user-friendly reference, which provided invaluable assistance and guidance during adaptation and implementation of our Company OH&S Policy and System.

The new 2007 edition received during February 2007, has been expanded by ASSA to incorporate additional and up-dated OH&S information, as well as all relevant legislative changes. The new Workplace Practices System Employee's Handbook was utilised in conjunction with revision of our Australian Workplace Agreements, in accordance with the recent Federal Government industrial relations reforms.

We would highly recommend the ASSA literature and software as an indispensable management tool, to any Company in Australia either embarking upon or setting-up, implementing or fine-tuning their OH&S System. The fact that specific ASSA publications have been developed in line with mandatory OH&S Acts and Regulations promulgated by each State, is a distinct advantage.

Without a Workplace Practices Manual such as developed by ASSA, compliance with the stringent requirements of the new Occupational Health and Safety Act and Regulations, WorkSafe Victoria Codes of Practice and Guidelines, and Standards Australia Specifications, would prove a formidable and unenviable task.

Yours faithfully
SAFE ACCESS SYSTEMS
